

## International Exchange Programs and UTS Motorsports – <http://sae.eng.uts.edu.au>

### UTS:ENGINEERING

David Mullins is off to Austria as an Exchange student. Before he starts his studies at the University of Applied Science Vorarlberg, he'll attend the "Formula Student Germany" event as a UTS representative in August. David has been invited to attend this event in the capacity of a technical inspector by the events design/technical judge to gain a better perspective of where the event is on a global scale, and report back to our Universities team, UTS Motorsports, with his findings.

This event is hosted in Hockenheim, at the infamous Hockenheimring in Germany's Rhine Valley, the site of the annual German Formula One Grand Prix, from August 6th -10th 2008. Like the Australian event of which UTS Motorsports competes in, this event is regarded as a breeding ground for up and coming Automotive Engineers. As such, several of the world's larger automotive manufacturers use this event as both an opportunity to network and recruit graduate employees. David hopes to make some contacts within these circles to broaden UTS research opportunities and develop sponsorship opportunities for UTS Motorsports.

Archie Johnston, Dean of UTS: Engineering, has very generously given some financial support to David's venture.

If any students are interested to become involved in UTS Motorsports, please see the team's website at <http://sae.eng.uts.edu.au/>
